

10th September 2021

Dear Parent/Carer,

Up to one in three people who have COVID-19 can spread the virus without knowing. This is because they have no symptoms. To reduce the spread of the virus, we need to identify those individuals. We can do this in schools by carrying out tests at home twice every week, 3-4 days apart.

[The Government has recently announced that](#) all secondary and college aged pupils will be offered tests to make the return to school safer for everyone.

Testing pupils at home

Pupils have been issued with home test kits, which should last until the October half term. If they require further test kits, they can be collected from reception.

We would like them to take their tests before school on Sunday evening or Monday morning and Tuesday evening or Wednesday morning.

Tests are free of charge. Pupils will receive a pack of 7 tests in a box with a leaflet on how to take the test and report the results.

Make sure you have enough time to do the test before going to school. Preferably this would be in the morning before going into school. However, we understand that for some people this may be challenging. Therefore, tests can be taken the evening before school if needed. You need to report test results. This approach is still required for pupils that do not attend college full time.

Taking the test

Pupils should take the test, before coming into school, twice a week. We will give pupils a leaflet with instructions on how to do the test with the kit. There is also a useful video to show you [how to take the test](#).

[Help and support is available](#), including instructions in different languages on how to test and report the results and a video showing you how to take the test. There is no need to keep used test equipment after the test result has been reported. You can put it in your normal bin (household waste).

This does not replace symptomatic testing. If you have symptoms, you should self-isolate immediately, book a [PCR test](#) and follow [national guidelines](#).

What should you do after the test?

Anyone with a positive test result will need to:

- self-isolate in line with the [stay at home guidance](#)
- [book a further test](#) (a lab-based polymerase chain reaction (PCR) test) to confirm the result, whether the test was done at home, school or college

Whilst awaiting the PCR result, the individual should continue to self-isolate.

If the PCR test is taken within the 2 days following the positive LFD result, and is negative, it overrides the self-test LFD test and your child can return to nursery, childminders, school or college, as long as they don't have COVID-19 symptoms.

If you are fully vaccinated or aged under 18 years and 6 months, you will not be required to self-isolate if you live in the same household as someone with COVID-19. Please refer to [Stay at home: guidance for households with possible or confirmed coronavirus \(COVID-19\) infection](#) for more information.

If the result of the test is **unclear (void)** you should do another test.

A negative result does not guarantee that you are not carrying the virus. So, you should continue to follow social distancing, and other measures to reduce transmission such as regularly washing your hands and observing social distancing.

If you or anyone in your household gets symptoms of the virus you should follow [national guidelines](#) on self-isolation and testing.

You need to report each test result

The result of each test needs to be reported using the NHS Test & Trace self-report website: <https://www.gov.uk/report-covid19-result>.

Why take part

Taking part in testing is voluntary and all pupils will be able to attend school whether they take part in testing or not.

I am strongly encouraging all pupils to take part. Testing at home will your child and other pupils to attend school as safely as possible.

Please contact Mr Hill, our COVID Coordinator, if you have any questions or concerns about home testing.

Thank you for your support.

Yours faithfully,

Mrs J Gray
Headteacher

Some frequently asked questions

Do I need to give consent?

Pupils and parents do not give written consent to take part in the home testing programme. Please read the information below on how personal information and test results are shared and the privacy notice at <https://www.gov.uk/government/publications/nhs-test-and-trace-privacy-information>.

Once you open the kit you should take and report the results of the tests to [NHS Test & Trace](#), regardless of the result (positive, negative, or void).

Can my child take the test themselves?

Pupils aged 12-17 should do the test themselves with adult supervision. The adult may help the pupil to take the test if they need support.

Pupils aged 11 must be tested by an adult and the adult must report the result.

Reporting problems or issues with testing

If there is an issue with the test kit, for example something is missing, please report it by calling **119** and please also tell the school.

If an accident or injury happens whilst using the test kit, please seek medical care by calling 111 (or 999 if it is an emergency). Please also report what happened using this website: <https://coronavirus-yellowcard.mhra.gov.uk/>

What type of tests will be used?

We will be sending home Lateral Flow Device (LFD) tests. They are a fast and simple way to test people who do not have symptoms of COVID-19, but who may still be spreading the virus.

The tests are easy to use and give results in 30 minutes. Further information:

<https://www.gov.uk/guidance/understanding-lateral-flow-antigen-testing-for-people-without-symptoms>

Are LFD tests accurate?

Lateral Flow Devices identify people who are likely to be infectious. These individuals tend to spread the virus to many people and so identifying them through this test is important.

These tests have been widely and successfully used to detect COVID-19 in asymptomatic individuals and are approved by the Medicines and Healthcare products Regulatory Agency (MHRA). The speed and convenience of the tests supports the detection of the virus in asymptomatic individuals, who would not otherwise have got tested.

The tests are highly specific, with low chance of false positives. They are also very sensitive and are able to identify the majority of the most infectious yet asymptomatic individuals. Extensive evaluation has been carried out on the tests and it shows that they are both accurate and sensitive enough to be used in the community for screening and surveillance purposes.

It is important to remember that these tests are only an aid to help stop the spread of the virus and you should continue to follow other guidance such as on wearing face coverings and social distancing.

How are LFD tests different to PCR tests?

There are 2 main types of test to check if you have coronavirus:

- polymerase chain reaction (PCR) tests check for the genetic material (RNA) of the virus in the sample - you send the sample for processing at a lab
- lateral flow device (LFD) tests detect proteins called 'antigens' produced by the virus

LFD tests give rapid results, in 30 minutes after taking the test.

What does it mean if my child has a positive result?

Anyone with a positive test result will need to:

- self-isolate in line with the [stay at home guidance](#)
- [book a further test](#) (a lab-based polymerase chain reaction (PCR) test) to confirm the result, whether the test was done at home, school or college

Whilst awaiting the PCR result, the individual should continue to self-isolate.

If the PCR test is taken within the 2 days following the positive LFD result, and is negative, it overrides the self-test LFD test and your child can return to nursery, childminders, school or college, as long as they don't have COVID-19 symptoms.

If you are fully vaccinated or aged under 18 years and 6 months, you will not be required to self-isolate if you live in the same household as someone with COVID-19. Please refer to [Stay at home: guidance for households with possible or confirmed coronavirus \(COVID-19\) infection](#) for more information.

What does it mean if my child has a negative result?

A negative result does not guarantee that your child is not carrying the virus. So, you should continue to follow measures to reduce transmission such as regularly washing your hands.

What if my child has a void result?

If the result of the test is unclear (void), they should take another one. If the next test is also void, your child should take a PCR test. You can [book a test here](#).

All test results need to be reported to [NHS Test & Trace](#).

Do I need to send the test to a lab?

No. The LFDs supplied do not need to be sent to a laboratory to get a result and can give a quick result in around 30 minutes. Guidance on self-testing is contained in the 'Instructions for Use' leaflet, which comes with the test kit. There is also a useful video to show you how to take the test [here](#).

How do you report the result?

You can report the result of the test (whether it is positive, negative or void) using this [service](#). You also need to tell the school the test result. You will receive a text or email from NHS Test & Trace confirming that you have reported your test result.

All test results need to be reported to both [NHS Test & Trace](#) and school.

Can I or someone else in my household use a test kit sent home from school?

No, however your household members can test themselves twice every week from home. This testing can be accessed through the following channels:

- get a rapid test at work, through workplace testing. Ask your employer for more information
- attend a test site to get tested where you will be able to see how to take the test or pick up tests to do at home (you can find your nearest test site via the postcode checker www.gov.uk/find-covid-19-lateral-flow-test-site or check your local council website)
- collect tests to do at home. Find your nearest collection site [COVID Test Finder \(test-and-trace.nhs.uk\)](https://test-and-trace.nhs.uk)

If these options are not possible, there will be a supply of rapid tests for order online for people who need them the most. More information can be found on www.gov.uk/order-coronavirus-rapid-lateral-flow-tests

How will personal information and test results be shared?

When your child takes a Lateral Flow test, you need to report the result. This is so that their test result can be traced, which means that you need to share some information about your child.

You need to tell NHS Test & Trace:

- your child's name
- your child's test result
- the reference number on the test Kit

When you report test results online, you are sharing information with DHSC. They may share the information with your GP, local government, NHS, and Public Health England. This is so that they can offer your family health services and guidance if your child needs to self-isolate. They might also use your child's data anonymously (without their name or contact information) to research COVID-19, and improve our understanding of the virus. For more information on how personal data is used for testing please see the detailed [privacy notice](#).
